OBJECTIVE

I'm currently a fourth-year student majoring at Data engineering. However, I know about Python, C#, JAVA, Hadoop, Spark, SQL Server, Hive, Couchdb. I desire to look for a good work place to work, attain knowledge of data engineering as well as make great values for company.

I am a hard working person and I always want to learn something new. I can work at high pressure environments. My goal is to be a Senior Data Engineer in 5 years next .

I intend to have a long term work and I can communicate English at moderate level

DBMS: Selling game website

Role: Database.
Functions: Select Orders, Place Orders, View Orders Quantity, Add Orders.
Usage: Java Servlet, SQL Server.
Experience: Building Database, Using Trigger, Function, View, Transaction…

Spark: Learn and build a spark streaming system

Role: Full stack.
Function: Continuous data transmission.
Usage: Spark 3.0.2, Python.
Experience: Spark, Pyspark…

Winform: Student Management

Role: Full stack**.**
Usage: C#, Entity Framework, SQL Server.
Function: Manage Students, Classes, Timetables, Scores.
Experience: C#, SQL Server…

Python: Logistic Regression with Social Network Ads dataset

Role: Full stack.
Usage: Python.
Function: Draw Charts, Logistic Regression.
Experience: Python…

Web: Selling website

Role: Back – end, Database.
Usage: Java Servlet, SQL Server, Java Script.
Function: Select Items, Place Orders, View Orders Quantity, Add Items.
Experience: Java Servlet, SQL Server, Java Script,…
